

In your own words, explain Django static files and how Django handles them.

Static files are additional files like site images or CSS. Static templates are configured in the settings.py file to be easily accessed from different apps.

Look up the following two Django packages on Django's official documentation and/or other trusted sources. Write a brief description of each.

| Package | Description |
|-------------------|--|
| ListView | List view is used to display multiple instances of a table in a database. |
| DetailView | Detail view is used to display the details of one instance of a table in a database. |

You're now more than halfway through Achievement 2! Take a moment to reflect on your learning in the course so far. How is it going? What's something you're proud of so far? Is there something you're struggling with? What do you need more practice with? You can use these notes to guide your next mentor call.

I had some trouble with structuring my static files, but after fixing that it got much easier to set up my images and CSS. The CSS was my biggest struggle because I'm not great at designing a visual layout but I think I picked a decent design.
